## Welcome to DialogLink - Version 5

### Revolutionize the Way You Work!

#### New on Dialog

Order Patent and Trademark File Histories Through Dialog

*Thomson File Histories* are now available directly through *Dialog*. Combined with the comprehensive patent and trademark information on *Dialog*, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in the following patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need.

*Thomson File Histories* are available from the following *Dialog* databases:

- CLAIMS/Current Patent Legal Status (File 123)
- CLAIMS/U.S. Patents (File 340)
- Chinese Patent Abstracts in English (File 344)
- Derwent Patents Citation Index (File 342)
- Derwent World Patents Index (for users in Japan) (File 352)
- Derwent World Patents Index First View (File 331)
- Derwent World Patents Index (File 351)
- Derwent World Patents Index (File 350)
- Ei EnCompassPat (File 353)
- European Patents Fulltext (File 348)
- French Patents (File 371)
- German Patents Fulltext (File 324)
- IMS Patent Focus (File 447, 947)
- INPADOC/Family and Legal Status (File 345)
- JAPIO - Patent Abstracts of Japan (File 347)
- LitAlert (File 670)
- U.S. Patents Fulltext (1971-1975) (File 652)

- U.S. Patents Fulltext (1976-present) (File 654)
- WIPO/PCT Patents Fulltext (File 349)
- TRADEMARKSCAN - U.S. Federal (File 226)

#### DialogLink 5 Release Notes

New features available in the latest release of DialogLink 5 (August 2006)

- Ability to resize images for easier incorporation into DialogLink Reports
- New settings allow users to be prompted to save Dialog search sessions in the format of their choice (Microsoft Word, RTF, PDF, HTML, or TEXT)
- Ability to set up Dialog Alerts by Chemical Structures and the addition of Index Chemicus as a structure searchable database
- Support for connections to STN Germany and STN Japan services

\*\*\* ANNOUNCEMENTS \*\*\*

\*\*\*

\*\*\* FREE FILE OF THE MONTH: World News Connection (WNC), FILE #985

Each month Dialog offers an opportunity to try out new or unfamiliar sources by offering \$100 of free searching (either DialUnits or connect time) in one specific file. Output and Alerts charges are not included. For more details visit: <http://www.dialog.com/freefile/> and then take a moment to get familiar with another great Dialog resource.

\*\*\* "Thomson File Histories" are now available directly through Dialog in selected patent and trademark files. Combined with the comprehensive patent and trademark information on Dialog, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in one of the patent and trademark databases, a link to an online order form is displayed

in your search results, saving you time in obtaining the file histories you need. See HELP FILEHIST for more information about how to use the link and a list of files that contain the link.

#### NEW FILE

\*\*\*File 651, TRADEMARKSCAN(R) - China. See HELP NEWS 651 for details.

#### RESUMED UPDATING

\*\*\*File 523, D&B European Financial Records

\*\*\*

#### RELOADS COMPLETED

\*\*\*File 227, TRADEMARKSCAN(R) - Community Trademarks

\*\*\*

#### FILES RENAMED

\*\*\*File 321, PLASPEC now known as Plastic Properties Database

\*\*\*

#### FILES REMOVED

\*\*\*File 388,PEDS: Defense Program Summaries

\*\*\*File 588,DMS-FI Contract Awards

Revolutionize the Way You Work!

New on Dialog

Order Patent and Trademark File Histories Through Dialog

*Thomson File Histories* are now available directly through *Dialog*. Combined with the comprehensive patent and trademark information on *Dialog*, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in the following patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need.

*Thomson File Histories* are available from the following *Dialog* databases:

- CLAIMS/Current Patent Legal Status (File 123)
- CLAIMS/U.S. Patents (File 340)
- Chinese Patent Abstracts in English (File 344)
- Derwent Patents Citation Index (File 342)
- Derwent World Patents Index (for users in Japan) (File 352)
- Derwent World Patents Index First View (File 331)
- Derwent World Patents Index (File 351)
- Derwent World Patents Index (File 350)

#### DialogLink 5 Release Notes

New features available in the latest release of DialogLink 5 (August 2006)

- Ability to resize images for easier incorporation into DialogLink Reports
- New settings allow users to be prompted to save Dialog search sessions in the format of their choice (Microsoft Word, RTF, PDF, HTML, or TEXT)

- Ability to set up Dialog Alerts by Chemical Structures and the addition of Index Chemicus as a structure searchable database
- Support for connections to STN Germany and STN Japan services

\*\*\* ANNOUNCEMENTS \*\*\*

\*\*\*

\*\*\* FREE FILE OF THE MONTH: World News Connection (WNC), FILE #985

Each month Dialog offers an opportunity to try out new or unfamiliar sources by offering \$100 of free searching (either DialUnits or connect time) in one specific file. Output and Alerts charges are not included. For more details visit:

<http://www.dialog.com/freefile/> and then take a moment to get familiar with another great Dialog resource.

\*\*\* "Thomson File Histories" are now available directly through Dialog in selected patent and trademark files. Combined with the comprehensive patent and trademark information on Dialog, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in one of the patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need. See HELP FILEHIST for more information about how to use the link and a list of files that contain the link.

NEW FILE

\*\*\*File 651, TRADEMARKSCAN(R) - China. See HELP NEWS 651 for details.

RESUMED UPDATING

\*\*\*File 523, D&B European Financial Records

\*\*\*

RELOADS COMPLETED

\*\*\*File 227, TRADEMARKSCAN(R) - Community Trademarks

\*\*\*

### Summary of the Invention:

...are transmitted to another routine, called a Resource Broker (BRO), that returns at least one "bid" for each step. A bid is a target start and complete time within the "window" set by the WOM. The bids are generated with regard to the finite capacity and previous scheduling commitments of the resources...

### Description of the Invention:

...open machine window, either on one machine or more than one machine. The broker formulates bids that contain the proposed start and finish times for the operation and an indication of...

...and the impact that scheduling this operation has on previously scheduled work. The broker selects bid windows to be returned to

the WOM according to a local strategy that may not...

...on the total shop throughput. The work order manager then scans through the list of bids from each broker and selects a set of award windows (one window for each operation...

...7 showing on the first line a set of five operations A-E having different bid windows in which they could be performed over a period of twenty-two days. The...

...of the sender to the receiver. Depending on their content and type, transactions represent calls, bids, and awards, as well as other queries or assertions communicated through the system. The transaction...

...No matter what the goal, the call-bid-award communications work the same way. Handling of various goals occurs in the selection method invoked when bids are returned...

...When the resource brokers are unable to return bids within the call window the WOM must generate a recovery action. Options are...

...2. Commit to the operations which have acceptable bids and leave the remaining operations unscheduled. This option may be preferable when most of the operations have received acceptable bids.

...

...writes a contract for each operation in the work order and sends a "request for bids", also termed a "call", to the resource brokers identified. The brokers return bids trying to maintain a good work center schedule. The work order manager selects the best bid from each broker trying to build a good work order schedule. This process (as well as the option 1 process) is guided by the weighted tardiness objective. The call-bid process may go on a number of times before a satisfactory schedule is determined. At...

...the process, the work order manager "awards" work to the broker based on the best bids.

...

...There are four scheduling windows calculated in CSS. These are: the call window, the bid window, the award window, and the contract window. Call windows are the early start and...

...basis of forward/backward duration logic. These are the windows communicated to the broker when bids are solicited. Call windows are typically larger than the processing time required for the operations. The second type of window is the bid window. These are the windows returned by the brokers in response to a call from the WOM. Bid windows too can be larger than the duration of the operation. The bid windows are truncated by the WOM to form the award window, which has a length...

...return one or more time windows within which their resources can perform the operation. Once bids are received, then one of them is selected according to one of several strategies that can be implemented in this system. If the bid meets the existing constraints on the work order, it is accepted and the broker is notified to store that time. If the bid is not satisfactory, then a different strategy may be applied and another set of bids solicited, if all strategies have failed then, of course, this operation cannot be scheduled within...

...same procedure is then followed for the remainder of the work order using the same bid and select sequence shown in FIG. 9. The starting date for the later operations will...

...FIG. 12 illustrates the selection process in which the work order manager selects the best bid from a set of bids submitted by the brokers. In this Figure, the work order manager loops through the bids received, checks them for consistency with the constraints previously stored and sets a set of flags used for communication appropriately as to whether the bid is accepted or rejected. If all flags are true the bid will be marked as satisfactory. Once a set of satisfactory bids has been selected, then a similar process to that for bid solicitation is used in which the information is converted to the standard transaction format and...

...of operation; a query in which it is asked to present information such as a bid response or and assertion in which it is directed to store data such as a...

...over the different strategies used by that broker. Typical strategies may be: try the present schedule; if unsuccessful, drop lower priority jobs in the same work order package; if unsuccessful drop unrelated jobs of priority three; etc. The windows that ...

...the work order manager, sending out calls to "sub-resource brokers" and processing these responding bids in the same manner as the main WOM interacts with the resource brokers...When the WOM schedules an operation or a work order it does so by soliciting bids from resource brokers. The proper brokers to contact are found in the operation. Each operation...

...a particular task. All brokers must be capable of responding to a call by producing bids that represent the possible slots for performing the task in the broker's workcenters...

...To formulate bids, the resource brokers will minimally require information about resources, operations, and schedules. The brokers must ...

...of temporary resource loss should be taken into account by the broker when it formulates bids for the work order manager. Examples of temporary resource loss include...

...they conform to the overall architecture. Primarily, this means that they must support the call-bid-award paradigm...

...as its primary evaluation function at all levels of the system. When the broker formulates bids each bid will contain a cost based on the weighted tardiness of both the operation itself and on the operations that would be impacted by awarding this bid. Any factors that affect the processing time of the job are easily incorporated into the...

...order manager. The reservation list is examined by the broker at planning time to compute bids for the work order manager and to respond to requests for capacity and load information...

...When the broker computes bids it examines the reservation lists for the applicable resources. If there is a gap in...

...to process the operation within its call window the broker can return a no impact bid. If no such interval exists, the broker must examine its reservations to find a bid with impact according to the policy guidelines provided in the call. Once the broker has supplied bids to a work order manager it must lock its reservation list so that it does not provide the same bids to other callers. Finally, when the work order manager awards one of the bids the broker is responsible for updating its reservation list to reflect the new commitment. If the work order manager decides not to accept any of the broker's bids, the broker will need to be notified of this so it can unlock its reservation ...

#### Exemplary or Independent Claim(s):

...for said initial resource operation at least one BRO means returns a bid to said WOM means specifying at least one suggested time slot for said initial resource...

...said WOM means selects one bid for said initial resource operation in accordance with a predetermined strategy, thereby scheduling an operation...

...one BRO means for each other operation in said predetermined set of operations and selects bids returned from said subsequent relevant BRO set, thereby defining a set of scheduled time slots...

...by said shop event and causes said WOM means to pass calls to and select bids from those BRO means associated with operations in said conflict set, whereby said system reschedules...

#### Non-exemplary or Dependent Claim(s):

...for said initial resource operation at least one BRO means returns a bid to said WOM means specifying at least one suggested time slot for said initial resource...

...said WOM means selects one bid for said initial resource

operation in accordance with a predetermined strategy, thereby scheduling an operation...
